# LEGAL DISCLAIMER

It is important that you carefully read this legal disclaimer section. If you have any doubts, seek legal, financial, tax, or other competent law professionals' guidance. All of the information shown here is not intended to be exhaustive, and it should never be construed as part of any formal agreement.

We are confident that the material in this white paper is correct and current, and that all products, services, technical architecture, token distribution, and corporate schedules are correct and current. Furthermore, all of this information may have been modified without notice, and it should never be construed as a binding advising agreement.

## **No Advice:**

Nobody is obligated by this white paper to sign a contract or make a legally enforceable commitment to donate. There is no advice in this white paper, and it cannot be used to sell or solicit Trillions' purchase of our token, nor can it be used to construct a contract or make an investment decision.

## **Compliance with Tax Obligations:**

If any taxes apply to their transactions, the users of the Website are solely responsible for ascertaining this. Who pays what taxes is not the responsibility of the website's owners or authors.

## **Limitation of liability:**

For any loss or harm originating from the use of this website's material, including written material, links to third-party sites, and data such as quotes and charts as well as buy/sell signals HITRO TOKEN will not be held responsible for any damages. Understand the risks and costs associated with trading assets on the financial market (digital or otherwise). IDOs, in particular, are one of the riskiest investment choices available to investors. Chances are you'll lose everything you've invested.

## **Investment risks:**

Because of the high level of risk, cryptocurrency trading is not suitable for all investors. Before trading cryptocurrencies, tokens, or any other digital asset, you should carefully examine your investment goals, level of experience, and risk appetite.

# ABSTRACT

HITRO TOKEN created a smart Liquidity network that is not only an emerging cryptocurrency that is built on the Binance blockchain but also has features of transparency, physical rewards, holding, token rewards, and Initial dex distribution, which we believe is crucial for long-term feasibility and decentralization.

This white paper is a reader-friendly description of a next-generation decentralized cryptocurrency based on BEP20. In the crypto market, several problems need to be addressed head-on. HITRO TOKEN developers sensed a real market opportunity to fill the gaps present today within the cryptocurrency world, Swaps marketplace adoption, and capitalizing on the BEP20 by rewarding HITRO TOKEN investors. These key characteristics serve as the critical elements of this business, ensuring that we remain focused and humble as we develop more extensive and better technologies.

# HITRO TOKEN

## Introduction

HITRO TOKEN is one click away to execute the quantitative trading system, real-time monitoring, realize automatic intelligence trading, tracking of complex algorithms, the best quantitative strategy to stop profit, maximize users profits, with a technical strategy such as built-in tracking for opening positions, trail order, and tracking stop profit.

Quant is everywhere. The pixels you watch on your screen, the Bitcoins in your digital wallet, and even the wizards in your AI bots that bring you money — everything is Quant.

Collaborating Artificial Intelligence with Blockchain and making Artificial Intelligence trading bots that are entirely powered by deep learning is revolutionary! And we are happy to introduce our innovative platform is a blockchain-based ecosystem that also serves as a strong foundation for a myriad of decentralized infrastructures, consisting of a cryptocurrency, peer-to-peer exchange, decentralized Finance, Crypto investment solutions, auto-mated smart escrows, cryptocurrency wallet, Non-Fungible Hitro ( NFT ), VR & AR Gaming ( Play to Earn + Battle to Earn )

On the Binance blockchain network, HITRO TOKEN functions as a utility token as well as an asset token for this decentralized network.

This white paper describes a decentralized BEP20 Smart contract address-based cryptocurrency in a reader-friendly manner. HITRO TOKEN is reshaping the entire ecology where users may trade digitally from anywhere in the globe for a cheap transaction cost that is almost free, allowing for a very liberating, strategic, low-risk, and frictionless trading experience in a fully decentralized manner.

This community-oriented money rewards its holders by redistributing it to others. As part of the decision-making process, community members are also included to give them a sense of ownership over their assets.

**HITRO TOKEN has a total supply of 969,969,969 HTO**

# MISSION

HITRO Token was conceptualized as a Smart technologies-anchored ecosystem aimed at solving the current problems associated with current conventional crypto trading & transaction processing services, including the delay in payment processing, fraudulent transactions, and expensive transactions costs. Further research into the Smart technologies escrows ecosystems revealed that current financial systems benefit from the Defi technology, which can solve the underlying challenges.

With the focus on building three primary functions as part of its Phase-1 deployment, HITRO TOKEN mission is to simplify the transaction process across the globe by offering an alternative to the expensive middlemen generally required in these specific types of transactions. The token will be used for discounts on services, dividends from staking, and as a governance token allowing the community to vote on how foundation funds are spent.

Our mission is to:

- To enable retailers to accept digital assets for goods and services
- To make Blockchain technology and cryptocurrency accessible by the masses, even if the majority don't know how it works
- To ensure users own personal data, which will significantly reduce the current data leaks via centralized financial systems
- Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.
- To create an ecosystem where different solutions can emerge from a social perspective, including collaborative applications.

# VISION

We envision building an ecosystem that is a decentralized financial system that can only be created by appropriately managing people, value, ownership, and reputation. HITRO TOKEN is going to establish an ecosystem to raise your asset value as tokens become scarce. With HITRO TOKEN, we try to develop an ecosystem built on strong monetary regulations with a robust and decentralized foundation, which users should expect.

# ECO SYSTEM

# WHY HITRO?

An ecosystem built on blockchain technology, HITRO includes a cryptocurrency, AI Crypto Trading Bots, DeFi, NFT, GameFi VR + AR and a cryptocurrency wallet in addition to other decentralized infrastructures such as a peer-to-peer exchange system.

There are a few quantifiable benefits of Holding Token with HITRO Blockchain ecosystem:

## BENEFITS

### THE USE OF SMART CONTRACTS MAKES THE SYSTEM HIGHLY SAFE

When it comes to security and privacy, HITRO excels because of his fast and stable gateway that is backed up with his ecosystem, making him superior to others. Cryptocurrency holders may now store their crypto on a highly safe and quick platform with HITRO.

### EARNINGS FROM PASSIVE SOURCES

Those that hold and control their digital wealth gain incentives. As a result of holding, the beneficiary receives passive income.

### SCALABILITY

Scalability is a term that is regularly used in the blockchain realm. Computer processes can be used or generated in an infinite number of ways. HITRO demonstrates the validity of stake protocols. Greater scalability is achieved through increasing transaction outputs and reducing fees.

# DECENTRALIZED FINANCE (DeFi)

## What Is Decentralized Finance?

Decentralized finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and institutions have on money, financial products, and financial services.

Some of the key attractions of DeFi are:

- It eliminates the fees that banks and other financial companies charge for using their services.
- You hold your money in a secure digital wallet instead of keeping it in a bank.
- Anyone with an internet connection can use it without needing approval.
- You can transfer funds in seconds and minutes.

## How Does DeFi Work?

Decentralized finance uses the blockchain technology that cryptocurrencies use. A blockchain is a distributed and secured database or ledger. Applications called dApps are used to handle transactions and run the blockchain.

In the blockchain, transactions are recorded in blocks and then verified by other users. If these verifiers agree on a transaction, the block is closed and encrypted; another block is created that has information about the previous block within it.

The blocks are "chained" together through the information in each proceeding block, giving it the name blockchain. Information in previous blocks cannot be changed without affecting the following blocks, so there is no way to alter a blockchain. This concept, along with other security protocols, provides the secure nature of a blockchain.

# ABOUT DeFi

## What Does Decentralized Finance Do?

The goal of DeFi is to get rid of the third parties that are involved in all financial transactions.

## Is Bitcoin a Decentralized Finance?

Bitcoin is a cryptocurrency. DeFi is being designed to use cryptocurrency in its ecosystem, so Bitcoin isn't DeFi as much as it is a part of it.

## What Is Total Value Locked in DeFi?

Total value locked (TVL) is the sum of all cryptocurrencies staked, loaned, deposited in a pool, or used for other financial actions across all of DeFi. It can also represent the sum of specific cryptocurrencies used for financial activities, such as ether or bitcoin.

## DeFi Financial Products

Peer-to-peer (P2P) financial transactions are one of the core premises behind DeFi. A P2P DeFi transaction is where two parties agree to exchange cryptocurrency for goods or services with a third party involved.

To fully understand this, consider how you get a loan in centralized finance. You'd need to go to your bank or another lender and apply for one. If you were approved, you'd pay interest and service fees for the privilege of using that lender's services.

# HITRO MARKETPLACE

HITRO Token is a vital part of our ecosystem dealing with NFH's. Non-Fungible Hitro (NFHs) are unique, non-interchangeable assets, minted on-chain. These Tokens can be linked to anything from digital NFH to physical assets. The core attributes of NFHs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary. We view the emergence of NFHs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. HITRO is a widely known NFT project. The underlying token for each HITRO encodes a unique genome that defines its appearance, traits, and hereditary lineage. This cannot be replicated and cannot be transferred without the user's permission.

# THE VALUE OF NFH'S

## 1- Limited

The shortage of NFTs adds to their appeal. NFT developers may build an unlimited number of non-fungible tokens, and they often modify the tokens to keep interest up.

## 2- Indivisible

The majority of NFTs are indestructible into smaller units. You will not be able to purchase a digital item until you pay the full fee.

## 3- Unique

NFT is completely safe and accurate because it has a robust information tab. This feature makes the NFT more unique and potent.

## Benefits of Non-Fungible Hitro Token (NFH)

Decentralized exchanges have been transformed by non-fungible tokens. There are some of the advantageous benefits of this cryptocurrency;

### 1-Easily Transferable:

The transfers of NFHs are centered on their uniqueness and indivisibility, thus the tokens are sold and purchased on a unique market.

### 2- Trustworthy:

NFHs are based on blockchain technologies. Consequently, you must be confident that your NFH is right, as counterfeiting a decentralized and permanent record is difficult.

### 3- Maintain Ownership Rights:

This is a network of open platforms the size of an NFH, with no buyer having the ability to modify the data later.

# HOW HITRO ECOSYSTEM IS TRANSFORMING THE NFT?

Transparency, authentication, ownership, provenance, copyright, and forgery have all been issues in the past. Moreover, the industry has historically been restricted to the elite who can manage to invest millions of dollars on a single piece of art or Game. On the other hand, is unquestionably intended to be enjoyed by everyone, and it can transcend all social and economic barriers.

Fortunately, with our designed ecosystem, the obstacles outlined above are nearly resolved. And, as of today, the art, and Gaming industry has created and effectively deployed amazing and sophisticated pieces of art. we are ready for transformation in the way NFT is purchased, marketed, sponsored, loved, and even made.

# HITRO TOKEN SWAP

A decentralized trading platform on HITRO SWAP will be added, satisfying the needs of fully decentralized payments. Smart Swap connects HITRO TOKEN making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world the dominant cryptocurrency, Smart Swap guarantees outstanding speed token processing and extremely low transaction fees so that the community can easily connect HITRO TOKEN is an easy, fast, and secure exchange creating a completely new ecosystem, built to facilitate a crypto derivative market where traders have access to a variety of trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way. HITRO TOKEN is going to launch its own decentralized exchange (HITRO TOKEN SWAP)

With Cybertic Swap, you can exchange crypto in your Private Key Wallet or your Trading Account. Exchanging from your Private Key Wallet provides you with the benefits of a non-custodial, on-chain trade settlement. Swapping from your Trading Account provides faster settlement and no network fees.

There are many great reasons our Wallet users love using Smart Swap:

Quickly exchange into an asset you believe will grow

Move out of a volatile asset into one of our cryptocurrencies.

Hedge against real-world events.

HITRO platforms are integrated into the top cryptocurrency trading exchanges in the world, this allows users to search and select the best rates for the transaction.

An additional benefit is that some crypto swap services do not require users to create an account

# HOLDING & HITRO TOKEN

As a less resource-intensive solution to mining, holding is used. It entails storing funds in a cryptocurrency wallet to finance a blockchain network's protection and operations. Holding, simply put, is the process of securing cryptocurrencies to obtain incentives. To maximize the rewards, investors can hold their cryptocurrency by validating HITRO Token and holding their tokens on the Smart exchange. The more the investors hold on to the exchange and invest in tokens, the more they will be rewarded and mint HITRO TOKEN.

# HITRO SMART CARD

Instantly load your card with HITRO crypto. Fund it. Spend It. Anytime, anywhere. Truly borderless cards let individuals make online or in-person purchases or withdraw cash from ATMs, even if the vendors and ATMs don't accept cryptocurrency. Instead of exchanging coins into local currencies, cardholders preload their cards with a set amount of cryptocurrency which is then automatically converted at the time of purchase. The HITRO Card lets cardholders spend their cryptocurrency anywhere Visa is accepted. Its support for multiple currencies, easy currency conversion, and top-notch security are why we chose it as the best bitcoin Digital card overall.

Also, Hitro Crypto Card will be released in Q3 of 2022

## Benefits

- Can be used everywhere in digital world
- Pay using multiple cryptocurrency wallets
- Multiple security features

# HITROVERSE

We are also developing our own HITROVERSE gaming platform in METaverse & AUGMENTED REALITY world where you can play games and Earn ( P2E & B2E )

## Metaverse and GameFi

The metaverse can be defined as a unified and interoperable VR space where users can interact with each other and the digital world around them through advanced human-computer interaction (HCI) hardware and software.

Hitro GameFi is a medium platform that connects players with the newly adopted concepts of NFT & AR games. Ever since cryptocurrency started to gain its power in the economy, many have sought to ride on these waves that might one day take over the future. As a result, the idea of Hitro GameFi was born.

Hitro GameFi brings about a combination of Game and DeFi, where the concepts of a real world marketplace has now been embraced in leisure platforms. The field of gaming now welcomes even investors and future millionaires, as progress made and assets accumulated in game can be traded within the decentralized market or translated into actual money.

## Play to Earn & Battle to Earn

This will be a crucial element of gaming in the metaverse & AR. Apart from following linear storytelling and rules, players can engage in profitable activities. A simple example: they might be able to sell the assets they have won inside the game to other users for crypto.

## The possibility of portable game assets

The interoperable architecture of the metaverse could allow for asset portability. Weapons or avatar enhancements acquired in one game could be portable to a different environment, and NFT rules would govern persistent ownership.

# AI TRADING BOT

## SUPER INTELLIGENT DEFI APP ( The Blockchain Intelligence )

Hitro is an automated Ai trading bot that has the speed of being able to trade cryptographic assets on the world's largest exchangers. This ecosystem supports crypto traders 24hrs fully automated who can generate maximum trading profit. Our bot follows the scientific approach of quantitative finance to trade easily and simply. Hitro is an AI-powered blockchain intelligence Ecosystem for compliance, security, and risk.

## Why Trade With Bots?

Professional traders have known it for years: bots are better at trading than people. That is why the BOTS app has been developed, so that you too can trade automatically.

You can open an account online in just one minute and start investing from as little as USDT50. BOTS can be terminated at any time without strings attached.

Coming soon to  

**Google play**

Coming soon to Apple  

**App Store**

# STRATEGIC SPECS OF HITRO BOTS

## Automated trading strategies

- Bots are trading algorithms that can perform thousands of complex calculations in seconds, enabling them to make trading decisions.

## Free to explore and cheap to start

- Monitor a bots performance for free or invest directly.

HITRO

## Achieve professional ROI

- Our bots make super fast trading choices to get the best results. Some can double your money in just a few weeks!

## Create your own bots

- Do you breathe algorithms? Add your own bot and earn money to let others use it too!

# AR TECH

## For Shopping and other Things

Space visualization and virtual tours. AR technology enables customers to walk through a store or a property before paying a physical visit to the location. The use of augmented reality enables them to get a feel of the place and learn about the essential details beforehand.

AR retail apps like Magicplan, for example, offer customers an AR-enabled residential property design planner allowing them to see how their homes will look after all the renovations are complete. Shoppers can even take a virtual walk through their renewed residences and estimate the materials they need for the renovation project.

Another example – the Lowes AR app helps customers quickly navigate through the brand's stores, pick better routes and quickly find what they need.

### AR-enabled Try-On

Virtual try-ons are some of the most vivid examples of AR applications in retail. Using AR apps, customers can try products on without visiting the store. For example, the Warby Parker eyeglasses brand offers customers an AR app to see how their faces will look if they wear different frames.

The world-renowned sportswear giant Nike has also launched an augmented reality shopping app called Nike Fit. Using AR technology, the app helps users estimate their shoe size and saves it in the app. The size can easily be retrieved as customers shop for shoes.

To illustrate how AR is being used in retail, let's take a look at how it transforms jewelry shopping. Customers can now choose precisely what they want by trying on pieces of jewelry they like virtually. Diamond Hedge, for example, is a solution enabling customers to shop for diamond rings from luxury brands, see how they fit them in real-time, and eventually buy them.

Due to the use of augmented reality, fashion and beauty industry players are also offering customers a different way to try on their products. Sephora's mobile app, for example, has a Visual Artist feature, enabling users to try on the brand's products using a combination of face recognition technology and AR. If users like their new look, they may order the products via an app interface.

# DECENTRALIZED EXCHANGE

It is an easy, fast, and secure exchange in a truly decentralized way. We are going to create an ecosystem where people will launch their own decentralized exchange. It is a peer-to-peer (P2P) that connects buyers and sellers. The Exchange is non-custodial, meaning a user remains in control of their private keys when transacting on a DEX platform.

# HITRO TOKEN WALLET

The HITROTOKEN wallet version is supported on both Android and iOS. The wallet is highly focused on enabling users to manage their tokens and interact with the ecosystem. The private keys for the wallet are stored on the user's device and are secured through Secure Enclave and biometric authentication technology.

Users can complete all the normal functions that a wallet provides. They can monitor their balance as well as send and receive tokens. Users can also exchange on through the HITRO Wallet and use and swap their tokens. The wallet enables users to access decentralized exchanges so that they can easily convert between their tokens. HITRO wallet is fast, secure, and will have a low transaction fee than others, and users can donate and vote for the organization by using our wallet. A user can hold and swap by using the HITRO Wallet.

Here are some of the important features of Wallets:

- Freeze and Unfreeze your card with a single tap.
- Create free virtual cards for online purchases
- Payment in local currencies
- View your Pin and change it at any ATM
- Allows transactions across multiple cryptocurrencies. This helps you do easy currency conversions.

# TOKEN DETAILS

TOKEN NAME : HITRO

TOTAL SUPPLY : 969,969,969

SYMBOL : HTO

DECIMAL : 9

NETWORK : BEP20

Contract address :

0xE73200C08559662DAfCA79af982C24b97BcD68D9

# TOKENOMICS

## TOKEN DISTRIBUTION

- 12% Whitelist 1 / Whitelist 2
- 20% Public Sale
- 25% Stake & Farm
- 2% Charity & Giveaway
- 10% CEX Listing reserve
- 3% Airdrop
- 10% Marketing
- 10% Partnership & Operation
- 8% Dev Team

## DEFLATIONARY

*Deflationary ( Transaction Fee )*

- Deposit Tax Fee Fix - 15%
- Withdrawal ( selling ) Start on PBS :
- Until Day 5 tax fee - 30%
- Day 15 tax fee - 25%
- Day 30 an above tax fee fix - 15%

\*\* PBS = Public Sale  
\*\* Liquidity Pool Lock for 365 days

# TAX FEE DISTRIBUTION

OUR TRANSACTION FEES ARE DESIGNED TO SUSTAIN THE PROJECT IN THE FORM OF MARKETING, DEVELOPMENT, LP AND BURNING. TO INCENTIVIZE OUR LONG TERM HOLDERS TO "HODL" \$HTO, THERE IS ALSO A 3% REDISTRIBUTION FEE

<b>3%</b>	<b>2%</b>	<b>2%</b>	<b>7%</b>	<b>1%</b>
REDISTRIBUTION FEE (HOLDERS WALLET)	LIQUIDITY POOL	BURN	MARKETING DEV & OPERATION	CHARITY

## The tax fees separate to:

- 7% Project Operation | System development | Marketing
- 2% Liquidity pool
- 3% Holders Wallet ( Reflection )
- 2% Burn
- 1% Charity

# ROAD MAP

## STAGE 2

- Public Sale on our Launchpad/Pancakeswap
- Audit And KYC
- Listing CoinGecko, CoinMarketCap & other platform
- Ai Bot App Platform Design & Prototyping
- Collaborations With Famous Influencers and Aggressive Marketing
- Tier-1 CEX Listings
- NFT Minting dapp launch
- NFT Marketplace Development
- Charity Program
- 10,000 \$HITRO Holders
- Ai Bot App Launch (Super Intelligent DeFi App)
- Major Giveaway for Holders & AMAs & Call Groups

## STAGE 3

- Platform Launch Beta (Limited Tournament Functionalities)
- Tier-2 CEX Listings
- CERTIK Audit
- Start development of Play-to-Earn & Battle-to-Earn Game (AR & VR))
- Marketing Phase 3 - Extensive marketing campaign & partnerships
- Billboard Promote
- CERTIK Audit & Website Upgrade
- Complete P2E and B2E game release (AR & VR)
- More to be Announced

## STAGE 1

- ✓ Concept Generation
- ✓ Develop contract
- ✓ Smart Contract Verification
- ✓ Marketing and Social Media Phase 1
- ✓ Website Launched
- ✓ Whitepaper Released
- ✓ dApp Launched
- ✓ Presale Announcement
- ✓ NFT minting/marketplace development
- ✓ Presale 1 & 2 on DEXSale
- ✓ Marketing Phase 2 (Press Release, TikTok, Twitter, Instagram, Youtube, Reddit, Telegram Channels)

## STAGE 4

- More to be Announced
